

Local Farmers Getting Coal in Medicine Hat

Means a Big Loss To The Local Merchants

Last week mention was made in these columns of the number of farmers who were coming here from the Hilda, Schuler and Irvine districts for coal from the river bank.

This week an entirely different picture was brought to our notice. It was that of a dozen or so trucks from the Binville district going through town with coal from Medicine Hat.

On enquiry the Review learned that these farmers were buying coal in Medicine Hat through a middleman. When asked why they did not get their coal from the established coal company in Redcliff, the reply was that they could not get it here with any degree of certainty. We were informed that these farmers are anxious to get their coal here as it saved them seven or eight miles haul, part of which was not over the best of roads, and because loading facilities here were much more convenient, as they were forced to wait in Medicine Hat till the coal car arrived and then load up by flashlight late at night.

We were also informed that if these farmers could get coal here they would deal with local merchants. It was estimated that between three and four hundred tons of coal will be required this fall for the Binville district alone. This together with the other districts and the other business left in town would mean thousands of dollars annually that the merchants, miners, garages etc. are losing through the loss of this coal market.

It might be a good idea if the council, the merchants' association or the railway association would take this matter up with the Brick & Coal Co. and see if some arrangement could be made whereby farmers could be assured of getting their coal here at any time during the fall and winter.

Messrs Goodline and Benjamin, who took over the Royal Cafe building just north of the Review office, in payment for the work done by them for the town have commenced the dismantling of the building.

Some Fine Fruit Grown in Town

During the past season Redcliff gardeners have shown what can be done in the way of growing fruits here. Several apple trees of both eating and crab varieties have been heavily laden and proved to be of an excellent quality for both eating and preserving. Several cherry and plum trees have also borne fruit in abundance and the salad or currant fruits have been as excellent crop. It is wonderful what can be accomplished with a little care and attention.

50 Most Perfect Show Girls Seen

Backed by a distinguished group of American artists and illustrators as Broadway's "fifty most perfect show girls" seldom equaled for beauty and precision, either on stage or screen, appears in "Moonlight and Pretzels," musical comedy photoplay showing at the Monarch theatre four days commencing Wednesday, Sept. 27th.

The fifty lucky chorines were selected from the combined ensembles of the New York musical comedy triumphs, "St. Nicky Pink," "Take a Chance" and "The Gay Divorcee," by a jury of famous beauty experts.

A great galaxy of stage, radio and screen stars are brought together in "Moonlight and Pretzels."

The C. G. I. T. groups of Gordon Memorial Church have re-organized for the winter months under the leadership of Mrs. N. White and Miss F. Buchholz.

Mr. and Mrs. D. Jensen are seeking the congratulations of their many friends to-day on the occasion of the twenty-fifth anniversary of their wedding day.

Two Jews stood on the pavement looking at a motor car one of them had bought.

Said Moses to Ike: "I say, that car is worth \$1,000. I am going to surprise you. I will sell it to you for \$500."

"Moses," replied Ike, "I am going to surprise you. I will give you \$50 for it."

"Ah, Ike," answered Moses "I am going to surprise you again. I will take your offer."

It is now agreed to subscription again. How is yours?

MRS. WILLIAMS

Phone 2071, Medicine Hat

Former Redcliff Boy Married Last Saturday

Miller-Collins

A very pretty wedding was celebrated in Medicine Hat on Saturday, September the ninth, at Holy Trinity Church, when Mary Ellen, only daughter of Mr. and Mrs. W. Collins, was united in marriage to Mr. Earl Albert Miller of Clear Hills, Alberta.

The bride was attended by Miss Natalie McCully while Mr. Henry Porter supported the groom.

Rev. Mr. Thompson officiated. Mrs. R. Hall played the Wedding March and during the signing of the register Master Lorne Hayward sang "I Love You Truly."

After the ceremony a reception was held at the home of the bride's parents.

The happy couple will be at home to their friends at Clear Hills, after October 1st.

Mr. Miller was until two years ago a resident of Redcliff when he left his father and the other members of the family for Peace River to engage in farming.

Those from Redcliff who attended the wedding were Mr. and Mrs. B. Hurlbut, Mrs. and Miss Phyllis Sheldon and Mr. and Mrs. F. Lavell.

His old friends in Redcliff wish Edwin and his bride many years of happy married life.

Mr. Sterling, manager of the Imperial Bank at Piapot, was in town last Tuesday to close the bank here.

Redcliff Reminiscences

Taken From Our File Of Sept. 25th, 1914.

Mr. A. Brydal, has returned from B. C. and will go into partnership with Mr. Murphy in the clocksmithing business.

While motoring to the Itan on Tuesday Mr. Baird met with what might have been a fatal accident. When rounding the curve at the foot of the hill his car took to the ditch and turned over completely. Fortunately Mr. Baird was thrown clear of the car and escaped injury.

"During the whole summer our manufacturing plants have been shipping out on an average of four car loads of goods a day."

The Review's offer to donate the proceeds of the street sale of next week's edition of the paper to the relief fund, has been accepted by the joint ladies' organization. Several girls will undertake the sale of the papers on Friday.

The Ladies' Relief Committee called \$88.50 from their Tuesday, \$10 of which was donated by the Sons of England.

According to the new G.P.R. time table, Redcliff will have two passenger trains each way a day, with two mail trains west and one east.

The government has spent about \$500 on the bridge and approaches at the Blair dam.

New Grocery Store Opened Up Here Last Week

Will Be Known As "The Black And White Store"

Last Thursday witnessed the opening of a new grocery store in Redcliff. The store which is located on Third St., next door to P. Campano & Son, will be known as "The Black and White Store" and will be under the management of W. J. Campano.

The building has been renovated throughout and now presents a clean, tidy appearance with black and white paint and trimmings for the shelves, counters and other fixtures.

It is the intention of the management to conduct a strictly cash business with a delivery service. The goods handled will be of the best brands and the management advertises a real up-to-date service.

Willard states that business for the opening week has been most encouraging.

Triumphant Team At Monarch Next Week

If you still have a laugh gland left, don't miss "When Ladies Meet." This sparkling new film comes to the Monarch theatre, Medicine Hat Monday and Tuesday next, with a roar of laughter from start to finish and with Ann Harding and Robert Montgomery co-starring in one of the most unusual stories we have seen on the screen in many months. This new Metro-Gwynn-Mayer picture is crammed full of sure-fire situations and dialogue that affords the important personages in the cast to make the most of it.

Miss Harding is superb as the wife of a philandering husband and Montgomery scores most as the newspaper reporter who finds his girl having a dangerous interest in the married man.

Hunters from town had a good weekend of sport for the opening of the wild duck and Hungarian partridge season. Among those who took in the opening shoot were J. Hop, R. Moore and F. Broughton, M. Gilbert, H. J. Cox and R. Beech, Joe and Jim Podesta, B. Hurlbert and G. McKay, Basil Moore and R. McKay. All about both duck and partridge were plentiful and all bagged a goodly number of both.

ST. MARY'S CHURCH
Celebration of Mass every Sunday of each month except first Sunday, at 8:30 a.m.

Presbytery Met in Redcliff This Week

Meeting Was Held in Gordon Memorial on Tuesday

The Presbytery of Medicine Hat met in Gordon Memorial Church on Tuesday. There was full attendance of ministerial members and a good number of non-ministerial members. Mr. Wm. Henderson very finely and fittingly welcomed the delegates to Redcliff. Rev. R. Erskine Fox was honored by being elected as chairman and Rev. R. D. Rinning of Medicine Hat as Secretary. Dr. Powell and Rev. R. W. Hurlbert of Calgary were present, and the latter held a conference with a group of young people in the evening. The members of the Off. J. Board and their partners entertained the delegates at a banquet in the Church Schoolroom in the evening and two or three delegates as guests.

"Gold Diggers" Coming To New Dreamland

A new type of film known as "Gold Diggers" is being created by director Mervyn LeRoy in the Warner Bros. production of "Gold Diggers of 1933," which opens at the New Dreamland theatre Wednesday, Sept. 27th.

This type of picture had its first summer in 1932 and it is "Gold Diggers" is said to eclipse it by the force of its catchy comedy situation, its dashy song hits and the novelty and beauty of its gigantic and spectacular dance ensembles.

The most difficult problem that confronted Director LeRoy was the proper balance of music and drama so that each would be a distinct show in itself. He solved the difficulty by putting on the screen the entire theatrical production with its songs and dances and gigantic ensembles, which the play could only hint at.

The production carries an all star cast which includes Warren Williams, Joan Blondell, Alvin MacMahon, Ruby Keeler, Dick Powell, Guy Kibbee, Ned Sparks and Ginger Rogers. Two hundred chorus girls are a part of the elaborate, mobile sets.

Last Wednesday evening Mrs. McLachlan entertained the members of the Ladies' Auxiliary to the Legion at her home. Whist and bridge were played. Miss M. Moore won the first prize for bridge and Mrs. Learmonth won the second. In whist Mrs. F. Cann carried off the first prize and Mrs. G. Carr the second. After the awarding of the prizes a dainty lunch was served and a social hour enjoyed by all present.

Hunters from town had a good weekend of sport for the opening of the wild duck and Hungarian partridge season. Among those who took in the opening shoot were J. Hop, R. Moore and F. Broughton, M. Gilbert, H. J. Cox and R. Beech, Joe and Jim Podesta, B. Hurlbert and G. McKay, Basil Moore and R. McKay. All about both duck and partridge were plentiful and all bagged a goodly number of both.

Now Grading On Second and Fifth Streets

Many Think Work Should Be Done on Third Street

Mr. Garner is now proceeding with the grading of Second and Fifth streets from Broadway to fourth avenue and on Fourth Avenue between these two streets. When the grading is completed these three thoroughfares will be graveled.

There is considerable complaining about this work being done on Second Street as it is felt by many that if it were done on Third Street instead, it would serve more ratepayers especially in the business section, as well as being a continuation of the work already done on this street.

The man who on his trade relies, Must either bust or advance.

Mrs. Geo. Myers and family, who have been holidaying at the Pacific coast for the past month, returned home last Sunday.

Mr. W. Hagerman, of the drug store staff, has returned to work after holidaying at his home in Claresholm.

Miss Phyllis Sanderson of Medicine Hat spent Saturday at home with her parents, Mr. and Mrs. A. E. Sanderson.

Mr. and Mrs. A. E. Shaw were visitors in Tully on Sunday the guests of Mrs. Shaw's brother, Mr. F. Mellan and family.

Albert Podesta returned home last week from Calgary, where he has been visiting his sister Mrs. W. Cox and Mr. Cox for the past few weeks.

Mrs. Rose and Mrs. Rathcliff of Medicine Hat were the guests of the former's daughter, Mrs. W. Wyatt Jr., last Thursday.

Mr. and Mrs. F. Congram and sons returned this week from a motor trip through Saskatchewan.

Archie Todd returned last Thursday, from Winnifred, where he has been working for the past two months.

Mrs. Janeeck and Mrs. Louisa, of Medicine Hat were residents of Redcliff for the past few years. Left last Friday to make their home in Armstrong B. C. their nephew, Jack Sinclair, who is to manage a fruit farm there accompanied them.

All things come right, be it soon or late,

To the earnest ones who work and wait

Who face life's problems every day.

In a patient, strong courageous way;

Then the haunting fears we worry about

Will disappear in scattered rout.

That phantom thing which men call fear,

When boldly faced will disappear.

DEAL AT HOME

Periodically in the past there have appeared in these columns articles drawing to the attention of our readers, the advisability of dealing at home as much as possible.

Owing to the many changes in the system of doing business both wholesale and retail, during the past year, many handicaps under which merchants in the smaller centres were laboring, have been removed, and now they are on a more equal footing to meet all competition.

That our local merchants have taken full advantage of these changed conditions has been clearly demonstrated during the past six or eight months, and that our citizens fully appreciate the efforts of our merchants to give the best possible service is also, quite apparent from the increasing business now being done locally.

The Review has good reasons for believing that our citizens are appreciating the efforts of our merchants in this connection. One is because our local subscription list is increasing almost weekly and several new subscribers have told us they wanted the paper regularly, so as to keep posted in the price lists of local advertisers.

We are quite well aware of the fact that there are some lines of general merchandise which are not carried or advertised by local merchants, and that it is necessary to go out of town to get them. Many of these lines are advertised in our local columns by outside firms. These advertisements will also prove interesting to readers from time to time and the Review would appreciate it if our readers would patronize those in these lines who are using our columns. Comparison of prices locally with those of larger centres now shows that it pays to deal at home not only because of the prices but in addition, because of the splendid service and convenience our merchants are giving. Indeed we have heard from many who have been comparing prices, that in several instances those locally advertised had a slight advantage.

Reports from all quarters appear to indicate that this is going to be a hard winter; not from the standpoint of the weather but because of the hard times. In this connection Redcliff has good reason to be much less fearful than many other towns. Nevertheless our conditions could be greatly improved if the real community spirit were developed to the extent which local conditions warrant.

JUST FOR FUN

Air Service Across Pacific

Designs For Powerful Machines Necessary Are Near Completion Within two years' time, 12 passenger planes will be able to board a 4,000-horse-power plane in Manila and arrive in San Francisco four days later, it is present plans of the Pan-American Airways for a passenger-freight service between San Francisco and Hong Kong are realized, according to Major James H. ("Jimmie") Doolittle, famed American speed flier and test pilot.

The schedule of stops includes Honolulu, Wake Island, Guam and Manila. The company estimates coverage of the proposed route to Hong Kong in five days, their aeroplanes reaching Manila in four.

Designs for the powerful machines necessary for such an undertaking are nearing completion. Outstanding features will be four 1,000-horse-power engines in each machine.

The passenger service, according to Doolittle, would be postpaid. Mail flights with mail and cargo had proved the safety of the trans-Pacific venture.

An Interesting Story

See Keeper Who Is Interested Discover Many Mysteries

Be farming is a most interesting study to anyone who cares to delve into the mysteries of nature. The winged sugar makers certainly are clever insects and provide one's eyes, especially in these northern climes where the winters are severe. William Puyabank, a local bee farmer, in speaking to us the other day mentioned his latest discovery. He had lost quite a number of them by moving as a result of which the queen escaped. We took about the new kind of bees with the long tongues—the insects that are able to reach further into the red and sweet clover blossoms and extract the honey, the ordinary bees cannot secure. He said that these new bees were of a Russian breed and that a bee keeper at Schererville had secured some of them for experimental purposes. The Schererville man bought them from a Texas bee man and that the bees were not yet acclimated. Another peculiar thing about bees is that the insects raised in southern climates where they can gather honey all year do not lay up honey to stay, but when they are brought to the northern climate they suddenly begin to lay up food for the winter. Nature apparently informs them of their necessity and tries to help the keeper is able to profit by this instinct of Providence.—St. Mary's Journal-Argus.

Have Faith in Future

People Could Learn Lesson From Farmers in West

The Minister of Agriculture for Manitoba has made a survey of farm conditions in his province. The information is that there are 2,000 farmers who have a total crop failure this year. How many of these farmers who have not registered total failure are not told, but the number would be large.

The farmer who has a total failure can do nothing about it. The months in the season which would have given him a chance to get a crop are past and gone; they will not again return this year. It is difficult to think of anything more helpless and destitute than the farmer who has registered a total crop failure. His season's investment has gone; he has secured no reward for his labor.

And yet, in face of that, we are informed that many of the people in this country are beginning to think and talk in terms of the crop they expect to have next year.

If men who have a total crop failure in 1933 are able to hold up their heads, then the rest of us should feel ashamed when we do much complaining.—Stratford Beacon-Herald.

When Labor Was Cheap

In 1772 French Laborers Got Twenty-Six Cents a Day

The bridge, built in 1772, which carries the western highway over the Seine, Nuisy-Sur-Seine, France, has become inadequate for modern traffic and is to be replaced. The new bridge, however, is likely to be more costly than the old. Accounts still preserved, show that the contractor in 1772 paid his masons 46 cents, carpenters 40 cents, and laborers but 26 cents a day, and they were not eight-hour days, either. But living was cheaper then.

Meadow Fescue grass is a fairly good milk producer, but its chief value is in fattening cattle.

W. N. U. 2010

ARMY OF CHILDREN AIDS SOVIET TO FIGHT FAMINE

Despite official denials of a threatened food shortage, Soviet authorities have taken extraordinary precautions to conserve the current wheat crop in Russia. An army of 100,000 children has been mobilized to aid the harvesting and protect the crop against thieves. The children are housed and fed on Soviet collective farms, where their principal duty is to garner the harvests of wheat left behind by the reapers. Although official denial has been made of a food shortage, the price of bread recently increased 100 per cent in Russia.

Logic Is Not All

Men Of One Of England's Bachelors Has Weak Spots

Canada has entertained an interesting personality in Lord Sneli, who is a member of the United Kingdom aristocracy. He is 68 years old, began work as a farm laborer and has been successively groom, farrier, clerk, agent, secretary, and a notable speaker on religious topics.

In a speech in the House of Lords on the National Union of Women's Bill, Lord Sneli, who is a bachelor, gave his views on marriage. "Men who fall in love and marry should be punished," he said. "Perhaps some sort of penalty for people who marry, a sort of compensation for robbing society of their intelligence for a time, would be a good idea."

Lord Sneli admitted that marriage was something beyond him. "I don't pretend to understand why people get married," he declared. "But so far as I can see, when a fellow falls in love he goes completely off his head. He is absolutely lost to all sense or reason, and cannot do anything or think of anything but the subject of his affection. For a time he is perfectly mad, and suffers from delusions—or, that's how it seems to me. I mean, I may be wrong—I've had no experience. But to me it seems just like that."

Trebled Salary For Artist

"Tipperary" Was Lucky Song For English Woman Singer

The woman who brought the very first copy of "It's a Long Way To Tipperary" was the first woman artist to sing it, 21 years ago, is Miss Winifred Ray, of Birmingham. Miss Ray, a music-hall artist, fought the past rights of the "song that won the war" from its author Jack Judge, for 11s. 6d. (about \$3). This was in February, 1912, a few weeks after the song had been written.

"I produced the song first at the Grand Theatre, Gravesend, on March 12, 1912, and sang it with success both in London and the provinces. I now have trebled my salary and allied my date book."

"By the end of 1912 the song was being sung all over the country, and at Christmas I sang it at the Manchester pantomime," she says. "Tipperary" would have fared through a stroke of chance. When the Lancashire troops landed in France in the early days of 1914, they marched to camp singing the song, because at Blackpool and the Isle of Man that holiday season "Tipperary" was the song hit of the moment.

Content Seldom Seen

Texas Wild Heron Keep Moving Until They Welcome Halter

A content in which man pitted his stamina against that of wild herons was staged on the Cyp Ranges, eight miles west of Fort McKavitt, Texas. It seldom is to be seen. Forty head of wild herons were "walked down." It is a process requiring time and endurance. A negro boy, relieved by cow-hands, kept constantly after the herd, permitting the heron no time to rest. Eventually, the animals became so weary that they submitted to the halter. The herd is one of the kind in the state.

Given Good Results

Created wheat grass has been tested extensively at the Dominion Research Experimental Station, Manlyville, Alberta, for the purposes of reseeded abandoned fields. Under the very dry condition—in the ranching area, this grass has given excellent results.—Dominion Agriculturalist.

Effect Of Electrical Storms

Individuals React To Them In Various Ways

Some people were discussing the effect which electrical storms had on various individuals. One lady admitted she was terrified. She explained that when she was a child of eight years she had been looking out of the window of her home and had seen the barn struck by lightning. The barn was close to the house and she had been knocked over by the shock. Since then she said she had never been able to put away that feeling of fear when a storm was on. Some there were who always laughed at her, a foolish and unfair thing to do. It was also recounted that a youth of 18 who slept outdoors on the veranda of his home had declined to come in the house during the storm at the weekend. His answer was that he rather enjoyed it all, and was as safe on the veranda as he would be elsewhere. He was having a good view of the storm and thought it was remarkable. His attitude is to be preferred to that of the person who wants to hide.

And yet it is unkind to ridicule the feelings of those who fear electrical storms. We can readily understand that the woman, who, as a girl of eight, saw the barn struck and received a shock at the same time, has a lasting picture in her mind. If she feels any better in the clothes closet during a storm, then that is the place which should be reserved for her.

Started Something Anyway

North Wales Boat Conductor Thought He Saw Plane Fall Into Sea

The young conductor of an omnibus named near Colwyn Bay, North Wales, thought he saw an aeroplane dive into the sea.

The alarm he raised involved: Two lifeboat stations; a police station; a coastguard station; two airports; and two aerodromes. Two motor boats; 100 Llandudno residents and 10 holiday makers in bathing costumes; and the passengers in a Chester-Llandudno train.

Nothing was found except a patch of oil on the sea. All the aircraft likely to have been concerned have been accounted for.

The Elbow Of Life

No Wind Any Better Than Good Genuine Laughter

A sermon on the benefits of laughter was delivered to the Society of Jewish Scientists, in New York, by Rabbi Morris Lichtenstein. "There is the tonic of life," he said. "Nothing will brace up a man so well as good hearty laughter. Nothing will so well dispel the clouds of depression and gloom as a good genuine laugh. It is a mistake to identify laughter with frivolity."

The ecclesiastical mind, especially that of the Middle Ages, was apt to look upon laughter, and, in fact, upon any mirthful diversion as a state of mind leading to sin. We regard laughter as one of God's dearest blessings. The genuine laughter of man is akin to all other mirthful expressions in nature. The infinite is a vast reservoir of joy. His presence is expressed in everything that He called into existence; everything, therefore, tingles with joy.

There are moments in man's life when all the things that are so very lovely lose their charm, when expiration becomes faint and hope dwindles. There is a hour nothing will bring man back to himself more quickly and more wholesomely than an occasion of recreation that will draw joyous, hearty laughter from him.

For centuries in the past men have endeavored to discover an elixir of life. Laugh and you remain young all the days of your life."

Petition Will Be Heard

Misswaste Indian Band Charge Funds Improperly Spent

The petition of the Misswaste Indian band charging that more than \$20,000 of the band's funds had been improperly spent by the Indian Department will be heard before the chequer court probably when it sits at Prince Albert in three or four days.

Richard Mulcaister, K.C., counsel for the band, has been advised to this effect from his agent at Ottawa. The petition had been presented to the Governor-General August 6, 1932. The Indian Department had sold part of the Misswaste reserve and are holding \$150,000 for the band, which can only be expended in terms of the treaty and certain surrenders. It is charged by George Dewar, chief of the band, and his councillors, that contrary to the treaty and the surrenders certain improper expenditures were made. Money spent by the department for the band and alleged to have been used for the purchase of drugs which were to have been free for provisions of the treaty; salary for farm instructors, when education was to have been free; maintenance of dead pupils to the prejudice of other members of the band, and excessive cost of 22 horses which had been purchased for the band in Ottawa, and shipped west to the reserve.

Origin Of The Soil

Evolved From Solid Rock By Chemical And Other Changes

"Many people look upon the soil as a cold, inert, lifeless mass of mineral and dirt, about which there is little to know, and in which there can be no interest," says Professor Sumner, of MacDonald College. "It is in fact, the true facts are that it is teeming with life. Its history is that of the history of the world; and its problems are so many and so deep as to challenge the best minds of the country all at one time solid rock. By a long series of chemical, mechanical, and biological changes it has been changed from the original rock into soils that now produce grain, hay, pasture, apples, peaches, and vegetables and fruits. Many are the influences which have operated in soil formation. We are accustomed to thinking of rock as unchangeable, but, very slowly and surely, changes do take place. As measured in terms of the life of man, the soil is very much. It has been estimated that the formation of one inch of soil from limestone rock takes about ten thousand years. The processes which have changed rock into soil are still going on and now exert a very important influence upon the fertility of our soils."—St. Thomas Times-Journal.

Thousands Going Blind

Ten thousand Frenchmen are slowly going blind. This was revealed at the opening in Paris of the French League for the Blind. It was told that in the 15 years since the World War, these men, wounded in the trenches, have been losing their sight. It is estimated that in another 15 years many thousands more will be sightless. At the French League, it was said, they are losing their sight will be trained to care for themselves when darkness comes.

Electrically charged rods are being used to catch fish in England.

Zipped Too Fast

A Negro taxi-driver was charged with having run down a pedestrian. "When you are driving," said the magistrate, "and you see you are about to hit some person, you should sign your car." "I did sign your Worship," said the Negro, "but dad man was signing too, and he signed so much faster than I could tag that it just nackered my eye me de wamin' in de head, ar' give me home to bid 'em."

Expert At Nest Building

Exhibits Are Queer Fish Seen In London Zoo Aquarium

Birds aren't the only creatures who build nests writes Craven Hill, F.R.S. "The fish are the tonic of life," he said. "Nothing will brace up a man so well as good hearty laughter. Nothing will so well dispel the clouds of depression and gloom as a good genuine laugh. It is a mistake to identify laughter with frivolity."

The ecclesiastical mind, especially that of the Middle Ages, was apt to look upon laughter, and, in fact, upon any mirthful diversion as a state of mind leading to sin. We regard laughter as one of God's dearest blessings. The genuine laughter of man is akin to all other mirthful expressions in nature. The infinite is a vast reservoir of joy. His presence is expressed in everything that He called into existence; everything, therefore, tingles with joy.

There are moments in man's life when all the things that are so very lovely lose their charm, when expiration becomes faint and hope dwindles. There is a hour nothing will bring man back to himself more quickly and more wholesomely than an occasion of recreation that will draw joyous, hearty laughter from him.

For centuries in the past men have endeavored to discover an elixir of life. Laugh and you remain young all the days of your life."

WORLD HAPPENINGS
BRIEFLY TOLD

The "Royal Scot" which has visited Chicago's World's Fair, will arrive in Canada at Vancouver. It will start its Dominion tour October 26.

Terms of a Franco-Russian commercial agreement for an interchange of products between the two countries was reported recently reached, following long negotiations.

Falling safety in his father's grain field at Carver, Alta., Mike Shagge, aged three years, was instantly killed when his father, not noticing the sleeping boy, ran a binder over him.

Archibald C. Manberg, 41, former Canadian lumber trader, commissioner in London, England, and imprisoned in Canadian lumber circle, died in hospital at Toronto, after a long illness.

The third plane bought by the government of Saskatchewan from the Royal Canadian Air Force this summer has been brought from Ottawa with Flight-Lieutenant F. M. Carter, chief pilot of the Saskatchewan flying service, at the controls.

Boys are better cooks than girls competing at the Canadian National exhibition, Toronto. Five classes—bread, rolls and buns, beef, powder, gingerbread, and cookies—were won by nine boys and girls eight to 17 years.

Moving of freight across Fitzgerald-Fort Smith 16-mile portage by aeroplane now is under way, according to reports received from the north. The freight is placed aboard the planes at Fitzgerald and flown to Fort Smith at the rate of one ton per hour.

Canada's new conversion loan may possibly be launched around Oct. 1 instead of Oct. 15, the date previously under consideration, according to well-informed circles. The success of the Canadian loan in London and the improvement generally in the money market are given as reasons for moving the date ahead.

Do Not Like Restrictions

Maximum Hours Mean Nothing To Men Doing Creative Work

An American service organization advises its clients that, as signed President Roosevelt's agreement regarding minimum wages and maximum hours and has certified that the conditions are already operative in the organization "except as to staff executives whose hours of labor cannot be limited."

Laws can be passed to put a definite limit on the number of hours of physical labor any person may be asked to do in one week. Laws can be passed to fix minimum hours for routine work of "white collar" subordinates. But no law can be passed to limit the hours of submission ever to be more than subordinate. But there is no law that human ingenuity can devise to fix a maximum working day for a man. A man might come to his office at 8 o'clock and leave at 4 o'clock and still be the hardest worker in his organization for his mind would probably be concentrated on his business problems for most of the balance of the day.

The men who are really doing the creative work of industry ask nothing but the privilege of working as hard as they like for as long as they like.—Financial Post

Prefer Staying On Ship

Port of Churchill Has No Attraction For Sailors

While shipwreckers of the deep water vessels who have arrived at Churchill this season say they are delighted with prospects of business in and out of the port, the crews turn a cold eye on the construction camps and the town.

They claim it is the dullness of all the 57 varieties of ports they visit in the course of a year, two failures coming ashore, for the most part, to play an odd game of English billiards, sip an occasional orangeade, and purchase a few picture post cards of Eskimos.

Then sighing for the "wine, women and song" of other harbor-fronts, they crunch their way over the gravel heaps and go aboard their various ships.

Railway Accidents In Canada

A total of 132 railway accidents, with 16 persons killed and 157 injured occurred during the month of June in Canada, according to a statement issued by the board of railway commissioners. Out of the 132 accidents, 15 took place at highway crossings, 13 occurring at unprotected crossings. Ontario led the provinces with seven highway crossing accidents.

Giving good advice is all right—if we give it to ourselves.

Gas From Coal

High Industry Being Established, An Industry Which Will Furnish Much Employment

One of the most striking of all the developments that have recently taken place in Great Britain is that of the production of petrol from coal. A week or so ago Prime Minister Ramsay MacDonald announced in the House of Commons that it had been decided to place a preference of fourpence a gallon on petrol so produced, and this was immediately followed by the public statement of the Imperial Chemical Industries that the construction of a plant to cost \$35,000,000 at Billingham-on-Tees would be proceeded with at once.

This plant will produce 70,000,000 gallons of petrol a year. It will provide employment for 5,000 workers, and will absorb the mine production of three thousand miners, that is 85,000 tons of coal a year.

Another plant is to be erected, probably at Doncaster, which will produce 100,000,000 gallons, giving work to 10,000 miners, and other plants are to be built throughout the coalfields, including South Wales, Northumberland, Lancashire, Forest and Dean and possibly Dorset. As soon as a provision begins work for 7,000 will be constructed, it is estimated. Further the iron and steel industries will be immensely stimulated, and several thousand more men will be required in the near future.

For scientists have been engaged in endeavoring to perfect the process of obtaining petrol from coal. It has now reached the commercial stage and it is reckoned that a high quality can be produced for seven pence per gallon. But the preliminary experiments have been costly, the expenditures on them being estimated at \$200,000,000.

This great new industry is proving a veritable stimulus to Great Britain in its efforts to establish trade recovery. The benefits that will be derived from it by the coal industry and others are hardly to be imagined. To the coal miners, who have been such heavy sufferers by the decline in trade, it will be a godsend.—Reginald Daily Star.

Recipes For This Week

(By Betty Barclay)

PARSNIP SOUFFLE

Cook four medium-size parsnips in boiling water until tender. Remove skins and rub through a colander. Mix together one teaspoon salt, one eighth teaspoon pepper, one teaspoon sugar. Add to the parsnips together with one tablespoon butter. Melt two tablespoons of butter in a saucepan, stirring in two tablespoons flour and one cup milk. When the mixture is thick and smooth add to the parsnips, together with the yolks of two well-beaten eggs. Beat the white of the eggs until stiff and fold into the mixture. Place in a well-buttered baking dish and bake for 25 minutes in a moderate oven. Remove and serve immediately.

BLUEBERRY AND APPLE CONSERVE

2 cups blueberries.
2 cups tart apples, diced.
2 cups sugar.
1 cup nut meat, chopped.
Juice of 1 lemon, grated.
Rind of one-half lemon.

Combine all the ingredients except the nut meat. Cook until the mixture is thick and clear. Add the nut meat just before taking from the fire. Pour into hot, clean glasses. Seal tight.

Boatback Left Fortune

Accumulated Large Estate In Last Thirty-Five Years

Pietro A. Ferraro, of Elmwood, who accumulated a fortune shipping goods, left an estate of \$150,815 gross and \$121,091 net, according to a transfer tax appraisal. Ferraro, who died on July 7, 1932, owned the boatback concessions in the Grand Central Terminal in New York for 30 years. A native of Naples, he came to America when he was 15 years old and started his career as a boatback on the Atlantic. Only \$17 of his estate was in stocks and bonds. He had \$90,900 in New York and Westchester real estate, 11 bank accounts, totaling \$21,000 and mortgages totaling \$7,280.

Rewards Not So Meagre

Reading that when Henry Thayer of Pullman, Wash., won a "loki" (bush-wheat) contest, fellow grain growers presented him with three gallons of ice cream. Thayer is inclined to think that probably the rewards of agriculture are not so meagre as they recently have been pictured.

Poland has placed a virtual moratorium on agricultural debts.

Advocate Change In
Form Of Education

Has. N. D. Baker Urges Preparation For Actual Conditions Of Life

Youth, educated to think the world is waiting for him with open arms, are choosing these lifeless books, one of the most tragic things in our life today. Hon. Newton D. Baker, former secretary of War and chairman of the American group who attended the Institute of Pacific Relations Conference said.

The entire capitalist system of the world must be readjusted before the life now afflicting it can be cured and before the problem of unemployment can be solved, Mr. Baker continued.

Two paramount factors must be faced in solving mankind's problem, he said. One is the sound education of youth, not along classical lines but with regard to the life which the youth must face when school and college days are ended. To attain this objective, Mr. Baker stated all the processes attending upon the education must be re-studied and new systems evolved.

"Second, there must be adult education. What is usually called an education must be continued so that, ultimately, there may be no uneducated man and woman. There must be a continuing process of education throughout life, Mr. Baker added.

"More and more world government is being influenced by public opinion," Mr. Baker said, "and it is highly desirable the knowledge and character of our adult people be improved. People are learning the most interesting and most valuable method of utilizing their own power. This is the continuation of their education."

One Contributing Factor

Decrease In Farm Horses Helped Create Economic Situation

The United States Census Bureau points out that land formerly used to produce horse feed is now being utilized for other purposes, thereby increasing the acreage of cotton, wheat and corn.

In a pamphlet entitled "The Farm Horse," Z. R. Pitt, livestock farmers to turn their attention to raising horses and mules as a good business proposition in the present economic situation.

"The decline of 6,318,696 in the number of farm horses and mules in the last decade is one of the main contributing factors of the present economic situation," he writes. "At least 15,000,000 acres of corn, formerly required to produce horses, have been put into other crops in the last decade. This added acreage, augmented by the release of that part of 3,000,000 acres of plowable pasture formerly devoted to horses, has resulted in surplus of various crops and livestock; in many crops the surplus have resulted in decreased prices for these farm products, greatly lowering farm purchasing power, and the reduction in the latter has affected the entire country."

The same thing may apply, though not proportionately, in Canada. The number of horses on farms in this country was shown by the census to be 3,115,582, as against 5,645,752 in 1921. The decrease was 3,530,170 or 57.4 per cent. In Ontario the drop was 1,371 per cent. The average number of horses on farms reported was 5.3 in 1931, as compared with 5.7 ten years before.—Woodstock Sentinel-Review.

Clara (a dentist's daughter): "Well, dear, have you asked dad for my hand yet?"

"Henry (very bashful): No. Every time I step into his office I lose courage. Today I allowed him to pull another tooth."

One ounce of tungsten is used to make 1 1/2 miles of wire, three tons of tungsten is used to make 100 miles of wire, for three-wire electric lines.

New Trade Envoy

A new trade commissioner is to be appointed to represent Canada in Britain, it has been announced at Ottawa. His special duties will be to develop trade in Canadian fruit in the United Kingdom and he will receive an initial salary of \$4,380 and will have allowances. The department of trade and commerce expects to secure an expert in Canadian fruit growing for the position.

Many Apply For Job

Advertising for a gift to assist in his 40th birthday celebration, Mr. Baker, seven days a week, John H. Baxter, contractor of Montreal, received 660 replies from men and women. Applicants included former office and factory managers, members of the architectural and legal professions and graduates of the faculties of science and engineering of McGill and Toronto Universities.

Biologist Speaks On Heredity

Education Is Also Needed To Produce Brilliant Men

The children of brilliant parents will never be as brilliant as their parents, but they will be above the average," said D. Ward Cutler, the biologist, at the British Social Hygiene Council summer school at Oxford.

"Similarly, except in the case of feeble-mindedness, the children of feeble-minded parents will not be quite as low-grade as their parents, but they will be well below the average of the country."

"It does not believe that education will ever produce a great scientist, historian, or literary man, unless the necessary characteristics are born in him."

"Nor do I believe that heredity can ever produce any of these men without the right environment and education."

"Plenty of love and cool liver oil," was urged by Mrs. H. E. Franklin, a better dressed than most men at the so-called "modern" training of children, at the World Federation of Education Societies in Dublin.

"With all our scientific planning," she said, "the child's heart still leaps when he beholds a rainbow in the sky. But the part of the child is often starved."

Use Of Tomato Juice

Takes The Place Of Orange And Aids Home Industry

Sidelights upon the battle waged between orange and tomato growers came up for discussion in an educational round-table conference at the Institute of Pacific Relations.

A Canadian woman delegate from Ontario pointed out the growth of physical education and its stress upon sound dietetics, resulting in the sudden burst of propaganda and education in favor of oranges which greatly expanded the sale and consumption of California fruit. This, so far as Canada was concerned, meant the import of oranges.

"It was not long," she said, before equally heavy pressure developed for the use of tomato juice as a substitute for orange juice, and educationalists were told the home-grown tomato was not only as sound a food as orange, but had the added advantage of encouraging home industry."

Symbol Of Friendship

Canadian Institute Of International Affairs Releases Pictures From Japan

Symbol of Japanese friendship toward Canada, a handsome picture by a noted Japanese artist has been presented to the Canadian Institute of International Affairs by the Japanese group attending the Pacific Relations Conference. The picture was presented to the Canadian group by Mr. Inazo Nitobe, leader of the Japanese delegation, and accepted by J. T. Tarr, Winnipeg, secretary of the Canadian group, and W. M. Birke, Montreal.

The handsome-framed picture is about 3 1/2 feet by 3 feet in size and done in silk which, it is said, will endure almost 1,000 years. The painting was done by Juppko Araki, one of Japan's great artists, especially as a gift to Canada.

If Conference Fails

Race For Air Armaments Would Result, Opinion Of London Paper

Great Britain will build 100 fighting airplanes, the fastest and most efficient in the world, and a new force of explosives, if the Disarmament Conference fails, the London Daily Herald asserted and forecast that disarmament failure would precipitate a race for armaments.

The new airplanes, the newspaper said, would cost \$2,000,000 and would be equipped with latest model 200-horsepower motors such as those with which Britain has won recent Schneider Cup races, capable of more than 200 miles an hour.

Linking World
By 'Phone

Paradey Building In London Will Serve Over 32,000,000 Subscribers

Paradey building, in the city of London, is to be the centre of a gigantic system of world-wide communications, equipped to serve over 32,000,000 telephone subscribers.

In all, the building, 11 stories high, covering a superficial floor area of 109,000 square feet, will be the most scientifically controlled building in Europe.

Many scientific devices to assist the operators and safeguard subscribers have already been added. These include:

Special automatic timing apparatus which checks conversation periods on the continental and island trunk services to a fraction of a second.

Two stop-words attached to the exchange points used for red telephone check calls to one-third of a second.

White and green lamps signify to the operator by pressure buttons the state of traffic at the continental exchange. This saves time by advising busy operators of the length of delay.

Small spot light systems reveal side circuits activated with outgoing radio telephone or island trunks.

Revolutionary changes are to be made in certain services to bring them up to date.

Chief among these will be the extension in the autumn of the "service on demand" to practically the whole of the distant long distance routes.

Services to be housed at Paradey house will include: A new toll exchange to serve 1,000,000 calls in and around London; city and central exchanges to be transferred from the old exchange to the new building; switchboards at Carter Lane to be enlarged.

Secret Is Valuable

How Self-Mouthed Creatures Tunnel Hardest Wood Problem For

The following article by W. Beach Thomas, appeared in the London Spectator:

Will you open of science who concern themselves with natural history settle the following point? How do caterpillars tunnel their way through self-mouthed creatures tunnel the hardest wood? Is their secret mechanical or chemical? I saw this week a hole of diameter half an English inch of considerable age converted almost into a comb by the caterpillars of the Goat Hawk moth. The hole is large and powerful and of that warning yellow coloration which suggests venom.

But the issue even of the mouth is soft, and a priori, it looks impossible that it should tunnel a substance which turns hard to iron. It is a caterpillar of the Goat Hawk moth, which ejects some chemical to help it. If so, it might be of no little importance to the caterpillar who would like to know what stuff which may make cellulose soft and palatable. Did not Mr. Haldane prognosticate this feat as one of the great evolutionary developments of the future.

Lens Made In Layers

British Opticians Have Perfected Unbreakable Glass For Spectacles

The great feat of spectacle being broken while worn and causing serious injury to the wearer is to be removed following long research by British opticians.

A lens made in layers, which said the manufacturer to a newspaper representative, did not break when hit with a hammer, has been perfected.

It was tested for 500 hours with ultra-violet rays; boiled up to 500 degrees Fahrenheit, and baked in an oven.

Further that it was frozen in a refrigerator.

Trying Out New Method

An electric "anaesthetic" is being tried out in the slaughter house at Milan, Italy. The animal to be killed is subjected to a 70-volt current, which is said to make him insensible to pain for a time long enough to permit scientific slaughter. Until it can be fully determined whether the electricity has a harmful effect on the meat, the new system will remain in experimental stage. Technicians fear a use of a current strong enough to produce instant death.

Artificially dried hay contains practically 100 per cent. of the nutrient value of the original grass, vitamin is included, and can be used to produce milk and cream of the same quality as produced when they are eating summer grass.

Aberdeen, Scotland, faces a water shortage.

For PIES, PASTRIES and MILK PUDDINGS

A few good words to tell you the value of this milk. It is a delicious milk that is not only good for you but also for your cooking. You should always use this milk in your cooking. It is a delicious milk that is not only good for you but also for your cooking. You should always use this milk in your cooking.

ST. CHARLES MILK

OCCASIONAL WIFE

EDNA ROBB WEBSTER
Author of "Jorica," "Lipstick Girl," etc.

SYNOPSIS

Camille Hoyt, young and beautiful, falls in love with Peter Anson, fellow student in an art school. He is the adopted daughter of a wealthy family, and he is a poor, struggling artist. On their first date, Peter spends most of his money to show Camille a good time, and then decides he must give her up because he cannot afford the financial strain. A chance meeting, however, proves the way for another date. This time they walk in the park.

(Now On With The Story)

CHAPTER VII

"You think I am going to art school for the novelty of having something to do," Camille began, as they walked through the park. "And that I am a serious thought to my head. You think I am a girl with a fortune and not an idea of earning a penny of my own. That's the girl you think I am. But you're wrong. My classes at National are only a part of my training to become a commercial artist. That means I want to work, and have to work. I'm not dabbling with art for a pastime, as you have been thinking. What's more, I'm not even planning for a distant future with the possibility of success as a famous artist. I want to be placed at and to use, illustrations for stories that will be read and forgotten, fashions that are whims for a day, glancing advertisements for linoleum, tooth paste and whatnot. In fact, I'll do anything I have a chance to try. Now you know." She stopped abruptly and the soft edifice of the night closed in about them isolating them.

Finally Peter said, "Kiss me? I'm glad to know that you are ambitious to do something for yourself, and all that, but what's that got to do with my forgiving you and your being busy?"

"Because I'm just a poor little rich girl who has to earn her money after the first of September next," Peter was puzzled. "But you are the Hoyt girl, aren't you? I suppose you were only dabbling in art for amusement. Are you really serious?"

"Just as serious as my situation. I really am a little frightened, Mr. Anson—about earning my living, my name. Sometimes I get to wondering how I could be of any use to anyone. I would be worth money to people."

"But your fortune?"

"I have no fortune. And my name is not Hoyt really."

He shook his head in bewilderment. "I'm still floundering."

RHEUMATISM GOT HIM

80-years-old Pianist is Relieved by Kruschen

Although old age has not yet kept this man from his occupation as a pianist, rheumatism had threatened to do so recently.

"Two years ago," he writes, "I was suddenly taken with rheumatism, all down my left arm. I tried many things—all to no purpose. I then commenced taking a half-teaspoonful of Kruschen Salt each day, and soon felt better. My arm, which was painful and nearly useless, was now as good as new. After a few weeks' treatment, quite better. I am more than pleased, as I am really happy, and playing made matters worse. I am in good health."

The six mineral salts of Kruschen have a direct effect upon the whole bloodstream, neutralizing uric acid, and thus relieving the rheumatism. They also restore the eliminating organs to proper working order, and so prevent the accumulation of uric acid and other poisons which undermine the health.

W. N. U. 2010

"I don't mind telling you all about it, if you still care to listen."

"I'm very anxious to know," Camille turned on the heels of her feet, him, and began to kneel. As a child reciting a story. "To begin at the beginning, I am one of a family of nine children—the middle one. My real name is Lorenz. But I didn't know that until three years ago, when I had been riding in the clouds for fourteen years and suddenly had to come down to earth in a parachute. I almost got tangled up in the strings and things, but I really landed feet first and looked around to see where I was. It wasn't such a beautiful place as I had left, either."

"But how did you get up in the clouds in the first place?" Peter interrupted, amused with her quaint metaphor.

"Oh yes, I'm getting ahead of my story. I went up when I was four years old. It was this way. My people had come to America before I was born, and they hadn't done so well here at that time. It seems. Anyway, once when I was four years old, a volunteer soldier relief worker came to our house to tell mother how to put more water in the soup because so that she could feed nine mouths with half rations. Of course, my mother hadn't lived in the middle of Europe, where many of the poor are on half rations most of the time, and the wealthy Mrs. Hoyt never having known how soup was made—she could do that. Anyway, it seems that I was quite a pretty child—in fact, I was deemed from my adoption."

"I don't doubt that," he interrupted again.

Camille dismissed that with a gesture of impatience. "—and the soldier lady who had no children of her own was so captivated by me that she

titles, industrial fortunes, social leadership. I depicted it all. At first, I was thought of as a child prodigy, and I was independent. But I learned that it was legally arranged for me to live with the "Leonore" until I was twenty-one. So I decided to make the best of it by training myself, while I had the chance, to make my living after I was deemed from my adoption."

Of course, I had to defy their wishes, by studying to be self-supporting instead of singing for the mistress of a fortune. That's why I have the blues," she concluded suddenly. "I'm

Freighter Again In Service

German Boat Was Sunk By Russians During War

After spending eight years on the bottom of the Baltic Sea and still usable, the "Leonore" had many adventures, but the most serious one came during the war when she was docked in the port of Lida, now owned by Lithuania. It was in 1916 and the Russians had decided to block the entrance of the harbor by sinking a number of ships. Of the 40 ships sent to the bottom as a protection against German submarines, the "Leonore" was one, and there she lay for eight long years until in 1924 it was decided to clear the harbor and the sunken vessels were refloated.

Steel Mill Receives Order

Big Order For Nails For British Market First In 14 Years

Announcement was made that the Dominion Steel and Coal Corporation had received an order for 3,000 tons of nails for the British market, first of its kind in 14 years.

The mill at the corporation's Sydney plant will begin production on the order immediately, employing about 130 men. The plant has not shipped a British nail order since 1910.

Tenth Vacancy In Senate

Two Vacant Seats In Upper House Will Have To Be Filled

The death of Senator G. D. Robertson closed the tenth vacancy in the Upper House.

Of this number, three are in Ontario, two in Saskatchewan, two in Quebec, two in New Brunswick and one in Nova Scotia. That present standing of the parties in the senate, inclusive of the 10 vacancies which will have to be filled, are 48 for the government and 40 for the Liberals.

"Reprinted Coler"

The experiment by which Canada's ten colony plants were introduced in Bermuda and brought back to Canada in Canadian National ships for the spring market, has been successful.

Some marketers have called the product "reprinted coler" and Bermuda and the British West Indies have been known as Canada's winter garden and tropical fruitland.

Canada Imported nearly 3,000,000 pounds of peanuts from the United States between January 1 to August 1.

More than 19,920,000,000 cigarettes were made in China in the first half of 1932.

When Your Daughter Comes to Womanhood

Give Her Lydia E. Pinkham's Vegetable Compound

Most girls in their teens need a tonic to strengthen their system. Lydia E. Pinkham's Vegetable Compound for the next few months. Teach her how to guard her health at this critical time. When she is a happy, healthy woman and mother she will thank you.

(To Be Continued.)

And be sure to get the genuine Gillett's Pure Flake Lye. Order a tin today. Ask for it by name at your grocer's.

GILLETTE'S LYE

Freightage Inflation

Manitoba Road In Saskatchewan and Manitoba Road With Outbreak

Next Year More than 16,000,000 acres of Saskatchewan grain growing areas are faced with a serious grasshopper infestation for 1934, and the provincial government is inaugurating an educational preventive campaign to combat the menace. The 16,000,000 acres represent practically half the entire area of the province under cultivation.

Manitoba is faced with an egg infestation covering two and a half million acres, which is deemed serious, but the prospects facing Saskatchewan for 1934 are much worse. Hon. W. C. Ruckelshaus, Minister of Agriculture, stated.

The Dominion entomological branch of the Department of Agriculture is making a survey of the province with a view to having detailed statistics covering all infested areas as a means of meeting the situation.

Pays In Protection

Well-Equipped Fire Department Is Not An Expense

There are those who complain about the expense of maintaining adequate fire-fighting equipment and who quibble over outlays to keep such equipment up-to-date. A modern and well-equipped fire department pays for itself many times over, however, in the protection that it affords inhabitants and in the prompt means of dealing with insipient outbreaks capable of developing into a catastrophe which the community thus commands.

Programme Of Works

Saskatchewan Relief Recipients May Have Opportunity To Work Out Indebtedness

A programme of work sponsored by town and village councils to work out the indebtedness of relief recipients will shortly be proposed by the Saskatchewan Relief Commission according to unofficial information.

If the scheme meets with the approval of the town and village councils, it will provide for the inauguration of individual programmes of work for the unemployed. The scheme is intended, however, rather than to provide for the improvement of streets, beautification of public grounds and other community undertakings.

Such a scheme would involve no expenditures on the part of the commission. It is understood, but rather would afford an opportunity for relief recipients working out their present indebtedness to the commission by virtue of 1931 and 1932 expenditures.

Not To Be Marked At

Canada's imports of hat dog skins are not to be marked. According to the Bureau of Statistics, the Dominion imported \$48,923 worth of winter hats in the first half of June, an increase of \$54,668 over June, 1932. During the 12 months ended in June the total was \$481,000, compared with \$375,000 in the previous 12 months.

Chinese Trainmen Executed

Thirty Chinese trainmen were executed in the province of Kiangsu and Manchung that caused between 30 and 50 persons to be killed or hurt, was estimated by Chinese authorities. The wreck occurred when the train jammed the track. Of the 500 passengers, 200 were military cadets.

War Risk Insurance Rates Have Been Increased In China

Zoo Animals On Air

A monkey, a cockatoo, a box turtle, an alligator, a python, a mynah (a kind of starling from India) and a toucan recently appeared before a B.B.C. microphone and television projector to give a broadcast. Leonard Haynes, the cockatoo, was the star attraction and the most talkative of this zoo variety company.

It is true that around the world English is rapidly becoming in effect a universal language. Oddly enough it is a language of business. The English language remains the universal tongue of scholars and diplomats.

In Italy milk is now used for the covering of sausages. What is used for the inside remains as ever a mystery.

Mr. and Mrs. R. Towle of Medicine Hat were visitors in town on Sunday, the guests of Mr. and Mrs. Sid Bailey.

Mr. Ed. McKinnon returned last weekend from Calgary where he has been undergoing treatment at the Belcher hospital.

Messrs Goodline and Benjamin have made a good job of the grading and graveling on Third Street. It is now about completed.

Albert Lien, who is now employed in a coal mine near Island, spent last weekend in town with his parents, Mr and Mrs. O. Lien.

Mr. H. Champ was taken to the Medicine Hat hospital on Monday morning suffering from internal troubles. He was operated upon immediately and is now progressing favorably.

Mr. McDonald, who has been here as manager of the local branch of the Imperial Bank for the past two years is leaving this weekend to take up his new duties at Edson.

A good program contributed by local and Medicine Hat talent will form the concert to be given in the School Room of Gordon Memorial Church on the evening of Wednesday September 27th beginning at 8:15. The price of admission will be: Adults 25c, and Children 10c.

IN LOVING MEMORY

Of our dear son and brother, John Edward Kitchen, who passed away at his home, Sept. 24th, 1925.
He is gone but not forgotten. Never shall his memory fade. Sweetest thoughts will ever linger.
I found the place where he is laid Mother, Father, Sister and Brothers.
